## PROJECTS

### Dart Throw

A travel application that allows the user to choose between three randomized cities throughout the world and choose whichever city is more appealing. For this project, I was responsible for the UI.

**Technologies:** Javascript, jQuery, Bootstrap, CSS, HTML

**Application:** [https://ramonavidallon.github.io/Project-1\\_Dart-Throw/](https://ramonavidallon.github.io/Project-1_Dart-Throw/)

**Github:** [https://github.com/ramonavidallon/Project-1\\_Dart-Throw.git](https://github.com/ramonavidallon/Project-1_Dart-Throw.git)

### Liri Node Application

Similar to Siri, Liri will work as a command center through the terminal that will return information using multiple API calls. There is a Youtube demonstration located in my readme.md.

**Technologies:** Node.js, Javascript, multiple API calls

**Application:** <https://youtu.be/DpiEvYViK-A>
